1. Claims 1-27 are presented for examination.

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-14 and 16-27 are rejected under 35 U.S.C. § 103 (a) as being unpatentable over Horie et al. (Horie) Pub. No. US 2002/0094191, in view of Asami patent no. 6,747,674.
- 4. As to claim 22, Horie teaches the invention as claimed, including a method for generating thumbnails facilitating media browsing, comprising:

analyzing a media input (page 5, paragraph [0074 – 0077]);

generating a plurality of thumbnail image associated with the media input based at least in part upon analysis of the media input, the number of the plurality of thumbnail images is determined based at least in part on an analysis of the media input (page 5, paragraph [0069 - 0077]); and

displaying at least one of the plurality of thumbnail images (Fig. 2, page 5, paragraph [0069 - 0077]).

However, Horie does not explicitly teach the number of the plurality of the thumbnail images is determined based on time-span of the media input.

Asami teaches fifteen picture thumbnails created from still pictures at intervals of

one minute of a moving picture having a duration of 15 minutes (Abstract; col. 3 lines

13-31).

It would have been obvious to one of ordinary skill in the Data Processing art at

the time of the invention to combine the teachings of Horie and Asami to generate the

number of the plurality of the thumbnail images is based on time-span of the media

input because it would allow user check the still pictures of a moving picture to be

searched at desired points of time and desired time intervals and in a desired quantity.

5. As to claim 23, Horie teaches generating the thumbnail image further based at

least in part upon at least one of a user's preference and a system default (page 5,

paragraph [0074 - 0076]).

6. As to claims 1-14, 16-21, 24-27, limitations of claims 1-14, 16-21, 24-27 that are

similar to limitations of claims 22-23 are being rejected under the same rationale. In

additional, Horie teaches media input is time-based (page 4, paragraph [0064]), at least

one media store such as hard disk, DVD; thumbnail selection component comprising a

remote control; media input is based on at least cable television broadcast; and media

display component and media delivery system coupled by a cable television connection;

and display component is a TV screen (page 3, paragraph [0048]).

7. Claim 15 is rejected under 35 U.S.C. § 103 (a) as being unpatentable over Horie

et al. (Horie) Pub. No. US 2002/0094191, in view of Asami patent no. 6,747,674 and "A

Application/Control Number: 10/055,539 Page 4

Art Unit: 2141

Multiscale Random Field Model for Bayesian Image Segmentation" by Bouman et al. (Bouman).

8. As to claim 15, Horie and Asami teach the invention substantially as claimed as discussed above; however, Horie and Asami do not explicitly teach the media analyzer utilizing a Bayesian decision making methodology.

Bouman teaches Bayesian image segmentation with multiscale random field (MSRF) and sequential maximum a posteriori (SMAP) (pages 1-2).

It would have been obvious to one of ordinary skill in the Data Processing art at the time of the invention to combine the teachings of Horie, Asami, and Bouman to use Bayesian decision making methodology to analyze media content because it would require less computation.

- 9. In the remarks, applicant argued in substance that
- (A) Prior art does not teach the number of the plurality of thumbnail images is determined based at least in part on an analysis of duration of the media input by the media delivery system.

As to point (A), Asami teaches fifteen picture thumbnails created from still pictures at intervals of one minute of a moving picture having a duration of 15 minutes (Asami, Abstract; col. 3 lines 13-31).

- 10. Applicant's arguments filed on 10/29/06 have been fully considered but they are not deemed to be persuasive.
- 11. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time

Application/Control Number: 10/055,539

policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Le H. Luu whose telephone number is 571-272-3884. The examiner can normally be reached on 7:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on 571-272-3880. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
